THURSDAY, OCTOBER 20, 1801.

THE MERCY OF THE WAR. We publish in another column an import ant manifesto from a number of distinguished Southern gentlemen, and addressed to the Governors of the loyal States. We call especial attention to the appeal-it is right; it is truthful; it is affecting and patriotic. A number of distinguished Southern men, who have perilled and lost all, now ask us, for the sake of humanity and for mercy's sake,

First. To re-elect ABRAHAM LINCOLN. Second. To crush the Rebellion. By doing this they assure us that the downtrodden people of four great Southern States will see the day of their deliverance from the most wicked and absolute tyranny that was ever generated by the sinful mind of man, or tempted by Satan. Read the document itself. and see if you have the heart to pass by the appeal unheeded.

LEES LAST DODGE. Not finding himself able to make much

headway against GRANT, LEE has resorted to a new and ingenious dodge, to aid the failing cause of which he is the main stay And what do our readers think it is? Simply nothing more or less than the paroling of all Union prisoners who will support the McClellan and Pendleton ticket at the coming election. Those of our brave boys who refuse to vote for the little gunboat hero are to be retained in captivity and sent further South. This is to be their punishment for standing by the country and ignoring those who would humble the nation at the feet of JEFF. DAVIS. If there are any who feel inclined to doubt the truth of this attempt, on the part of LEE, to aid his old friend McCLELLAN, let them read the following statement, subscribed and sworn to by Union soldier released on the last day of August, and sent home with the understanding that he would vote the Copperhead-Peace ticket :--

*State of Pennsylvania, Monigomery county, 18:

"Personally appeared before me, a justice of the peace in and for said county, Franklin Schwark, of Upper Providence township, Montgomery coonly, and State of Pennsylvania a privace of Company H, 13th Regiment Pennsylvania Cavairy, who, on his solemn onth, deposeth and says, that on the 9th day of Masch, 1864, he was taken prisoner near Bristow Station, Va., and conveyed to Belle Isle prison, and from thence to General Hospital No. 21, in Richmond; that on the last day of August, 1864, the director of said hospital waited on him, and proposed to parole him and to permit him to return home if he would promite to vote for George B. McClellan at the approaching election; that he, the said Franklin Schwark, in order to escape from starration and Robel atrocky, did make said promise, and therefore was paroled. The said Franklin Schwark further says, under his solemn oath, that all prisoners of said hospital who frankly and positively said they would vote for Anna-Ham Lincoln were not paroled, but retained in said hospital. Franklin Schwark, "Witnesses present: Dr. Warnen Royen, "Samuel Pennyla Acken."

"Samuel Pennyla Acken." " SAMURL PENNYPACKER.

"Sworn and subscribed to before me, the 10th day of October, 1864.
"Henry W. Kratz, Justice of the Peace." that the Richmond Cabinet of traitors really hope for the election of the Chicago nominees. They look to such a contingency as their only chance for success, and so far as they are able to contribute to McClellan's support they will do it, and that with as much anxiety and earnestness as the drowning man who clutches

Let the voters of the free States, the friends of our common country, and the advocates of freedom, pouder well this last dodge of the

POLITICAL ETIQUETTE. "General McClellan is a gentleman." If you ask a certain class of men why they intend to vote the Democratic ticket, this is the answer you get. If it is the truth, and we are willing to admit it, it ought to follow that his party is the gentleman's party. A gentleman does not lie; but what are we to call the statements that Mr. LINCOLN draws his salary in gold—that the public debt is now \$4,000,000,000. and is increasing at the rate of \$3,000,000 a day-and that our recent military operations are in reality defeats, which are concealed from the people by the Administration for electioneering purposes. If these are not wilful lies, we are no judge of the article. Again, a gentleman does not libel and slander any one, not even his enemy. But what can we call the Democratic abuse of Mrs. Lincoln, of the President, and of every member of his Cabinet, and more particularly of every mamher of their own party who has been induced, by patriotism, to support the Administration? So a gentleman does not use abusive language. What are such expressions as "tyrant,"

"diot," "baffoon." as applied to the President of the United States by that eminently decorous organ of Democracy, the New York World, and that other organ, neither so sminent nor so decorous, the Philadelphia Age. In short, there never has been a political campaign conducted with so much misrepresentation of facts, so much slander of character and motives, and so much outrageous personal abuse, as has been employed in the present contest by that party which boasts that its candidate is a gentleman.

OUR NATIONAL WEALTH-GOLD AND

PETROLEUM. The vast material resources of this country have long been and still remain a marvel and a mystery to the world. Yet great as they ment, who wend to live in Concord. His name are, it is past doubt that human ken has not | was Broad. He was never in a battle before, as reached, and probably never will completely he had been connected with the ambalance comprehend the boundless, inexhaustible train. He met his death in this way:-There mineral and other like wealth of the United | was a man strack by a solid shot, it caming States of North America and their territories, one of his legs nearly off. The poor fellow It will require thousands of years of time, and | was bleeding to death, but if brought off would a population dense as that of China or Japan, in all probability get well. Broad was the to begin to develop the untold and buried only man who would velunteer to go out and riches of our magnificent domain. We of this generation do not even imagine what our pos- nor child to suffer if I am killed," so out he went,

elaborate exposition of the subject. It is not that we all thought he had escaped the bullets possible in a newspaper article to enumerate | But, alas! poor Broad was a wounded man. He fully, much less, discuss in detail, those different items of natural production which go have saved your life, but I have lost my own."

In was about through the bowels, and ded very soon after. He was as brave a man as ever lived.

Trans Black to the Market Street Congression of the Street Street Congression of the Street Cong

destined hereafter to make this nation that most epulent, presperous, and powerful that has ever existed in the tide of time. It is already known that our beds of coal and iron are of enormous extent, and not capable of sahaustion for thousands of years. There are moreover, other minerals and metals hidden in the howels of the earth, yet not suspected, but which accident or scientific exploration, will to the season befor to light.

What idea had our colonial progenitors of the Derade on the shores of the Panific? It is only a few years ago that the golden treasures of California were opened to our vision; and since that period our daring and enterprising people have not only added millions upon millions of suriferous wealth to the treasury of the world, but redeemed to settlement and civilizantion a region which, though only a little while ago a howling wilderness, promises to become the richest and most thriving section of territory on the globe. In respect to the gold and silver mines of this country, few of our people have any adequate conception. Our ability to produce money, says an intelligent writer on the subject, is guaged to 1859 by the following facts:-

In a product of \$210,434,355 of gold, we produce \$93,434,355, or very nearly one-half. This, too, was North American and not continental; the crop from South America being so small as to hardly enter the estimate. It was also a product of the United States, as neither Mexico nor Canada contributed what is deserving of mention as a respectable fraction. In a total silver product of \$53,000,000, America yielded \$40,000,000, or very nearly four-fifths. Of this the larger share came from South America and Mexico, the yield of the Union at that time being very trifling. It has attained somewhat more prominence since. The grand aggregate, \$264,434,355, ascertains our share to be \$133,434,355, or more than half.

But these facts are not large enough to measure the present. In 1859 Nevada was unknown, Arizona unworked, Idaho unnapped, Colorado unexplored, Montano a wild, and Utah a wilderness. They are now organized territories, and about emerging from their chrysalls condition as sovereign States. The change is worked solely by their wealth. So wondrous is it that even California contributes to their population, while the world continues to flow to California

But here in the East there is a later disovery of natural wealth, quite as marvellous and profitable as the gold discoveries on the Pacific. It is only the other day, comparatively speaking, that in the northwest corner of Pennsylvania a new source of wealth was detected and uncovered, which has caused a sensation even greater than that occasioned by the first revelations of the golden sands of the Sacramento, and promises to prove of far greater utility and value to the commerce and industry of all nations.

The wells of coal oil in Venango county are literally flowing forth continuous streams of precious liquid, and those who originally owned the lands, or have since purchased in fee or leased them for the purpose of development, have suddenly realized fortunes of almost incredible magnitude. The excitement on the subject is unprecedented, and is increasing daily. They who have fancied that it was a visionary and short-lived fever have been and are destined still to be greatly deceived in that concelt. Investigation and experiment have shown that the deposits of cil are not limited to any single district, but run probably with little interruption in a certain line from northeast to southwest as far down as Kettucky, if not beyond that.

Recent discoveries in Greene county, in this State, justify the belief that the oil of that region is not only of a quality superior to any yet found elsewhere, but that the yield will This is only one of many instances which also be more abundant and lasting. Davelophave come to our knowledge, and it ought to ments of a similar character are making in Western Virginia and in certain portions of Kentucky and Ohio; and the reasonable expectation is that the oil business, both in production and consumption, is now but in its inception, and that it will go forward, from this time forth, growing and expanding in impor:ance and influence to an incalculable extent. We are fully warranted in this expectation by

the past developments of the trade. Up to 1863, the progress of the petroleum trade astonished everybody, but that of the past year has exceeded all expectation. It is evident that the wells have no bottom. What the product for the year has been we cannot say. It may be that, in the excitement of a highly prosperous business, no accurate account has been kept; but the custom-house figures give some indication. Petroleum is experted to every country in the world. In 1861 we shipped 1,112,476 gallons; in 1862 it rose to 10,887,701 gallons; and in 1883 it reached the extraordinary quantity of

28.000,0000. In addition to this foreign export, the home demand is enormous. Though the whole business is strictly a new one, yet it has already assumed shape and stability. Ships for conveying it to England are constructed oil-tight, and the barrels emptied directly into the hold, thus carrying it in bulk. The export last year employed what was equal to 252,000 ships of 1000 tons each, and was worth near \$15,000,000 if sefined, or \$12,000,000 if crude. The export for this year is estimated

at 40,000,000 gallons. Such facts seem almost fabulous, and yet they are severely true and substantial. They certainly warrant all the interest yet taken in coal oil lands and stocks, and justify, moreover, the prediction that petroleum is destined to become greater than cotton or gold as an element in our wealth and commerce.

WE INVITE attention to the statement in our city news report of the vigor and energy with which the supporters of the Government in the Tenth Ward have gone to work. We trust that other wards will follow the example of that stronghold of loyalty, and if the work has not been commenced that it will be started immediately.

-Three Venuses have been banlahed from art

ircles in Munich. - In the battle of September 30 there was a young man killed, a member of the 57th Regifetch him in. It was almost certain death for any man; but, said Broad, "I have nelt or wife terity in a not very distant age will more than and picked him up, put him on his shoulder and brought him in safely, though the bullets flew We have not space here to go into any very like hall around him. He came in so promptly

LITERARY BRUIEWS

The work before us was evidently written for the double object of paying to General McCiellan the offering of fulsome flattery and of hurling upon President Lincoln all the epithets that par tions malignity could invent. At the outset of

tisan malignity could invent. At the outcot of his work, the author prepares the reader for a course of violent abuse by terming Mr. Lincoln on most mulignant Mexican Copperhead," and the style thus inaugurat d is preserved throughout the work. The who e production beam the stamp of thus Southern sympathy, taying the him of the war upon the North, and palliating or even praising the policy of the South.

It is written in a narrative style, which admits of nodeplay of crisin-lity of either thought or expression. The author uses his metaphors rather freely, and speaks of the "oscillation of erystallisation," showing a limentable ign range of the formation of erystalls. The work will, deathers, have a large circuitation among the Demogratic masses, but will not be popular among the cultivated loyalists of our city.

SOUTHERN SLAVING IN ITS PRESENT ASPECT. By Daniel R. Goodwin. J. B. Lippincott

We have received from the publishers a copy of Dr. Goodwin's admirable work, and can, with sincerity, recommend its perusal to all who desire to understand fully the true Bible view of alst very. The work is ably written and the diction is remarkable for its purity and elegance. It criticizes with courtery the late work of Bishop referres with couriesy the late work of Bishop Hopkins, and refutes the fallacies of the views therein expressed, not by arguments drawn from external sources, but by the internal evidence advances by the Bishop himself. All the deductions drawn are founded upon a purely logical bisis, and no appeal to the passions or sympathies of his reader is attempted, as has been so ably done by Mrs. Stowe and others. The work is not intended for a political campaign document, as was that to which it replies, but is the production of the brain of an accomplished scholar and confernan—in fact, just such a one as we should tion of the brain of an accomplished scholar and centleman—in fact, just such a one as we should appear from a writer of Dr. Goodwin's ability. STARS AND BARS. By Isanc Kelso. Williams &

It is one of the sad effects of war that the evil it inflicts is not confined to the loss of life and property, but it depraves morals and vitiates literature. The work before us is, like too many of the present time, founded on the events of our civil war. While it has the true ring in its polltical opinions, its characters are overdrawn the rolliequies of its here are so overwrought that they sound more like extracts from a set oration. The work, however, will repay the perusal of the lovers of the terrible.

We have received from G. W. Pitcher a work entitled the "Tiger Prince," by William Dalton. It is an admirable book for boys, and we predict it will acquire as much popularity as the works of Captain Mayne Reid. W. B. ZEPHER has our thanks for the "United States Blue Book," and also for that valuable work of reference on "National Banks." No hanking house in the country should be without it.

BIRNEY'S SHARPSHOOTERS .- The 203d Pennsylvania Regiment (Birney's Sharpshooters) which was recently recruited in this city, has been assigned to duty in the 10th Army Corps (Fo-ter's), and has been some time doing good service near Chapin's farm, six miles from Richmond. Under the efficient care of Colond J. W. More, the regiment is rapidly improving in both drill and soldierly bearing, and bids fair to rival shortly our veteran troops in coolness and bravery.

At the election held there on the 11th inst., 700 otes were polled :-

ELECTRICITY.

BUFFICIENTI All diseases conditions, both scote and chronic, where there is vitality enough left to react, are permanently cured, by warrantee, at No. 1220 WALNUT Street, Phila-delphis, and in case of a failure in most obstinate maladies, no charge is made. Electrical Institution, setablished about five years ago by Professor BOLLES. Read the following :-

A class of maladies prevails to a fearful extent in comnunities, dooming 100,000 yourbs, of both sexes, annual to an early grave. These diseases are very imperfectly understood. Their external manifestations or symptoms are nervous debility, relaxation, and great exhaustion, maranmus, or wasting and consumption of the tissues of the whole body, shortness of breathing, or too hurried breathing on accouding a bill or flight of stairs, paipliation of the heart, authors, bronchitte, and a dry, sore throat, trembling and sharing of the arms and lower limbs, aversion to society, business, and to study; sometimes dimness of the eyesicht, loss of memory, dissuess of the head, remainis pain in various parts of the body, pains in the back and lower limbs, lumbago, dyspepala, constipution of the howels, deranged socretions of the kidneys, and many other glands of the body, producing virulent absence in both mates and funales; likewise collegey, hysteria, and different forms of nervous want of auccess by any of the old medical systems of

want of success by any of the old medical systems of practice. Durklasks of FEMALES.

Prolapaus Uteri, Leucorticos, Annocorticoa, and Dysmendirhous. All the above diseases and other Uterim compinints have their origin in a less of the vital power of the bedy brought on by loghtest, excesses, a delitery halds, pursuant abuses, aborticus, and the use of powerful helds personned abuses, aborticus, and the second powerful helds and extreme languar and dubtilly throughout the online system. The effects produced from these troublescope moderates are almost multituffenous. Consumption, Dyspelia, Neuralgia, Parstyuts, Deafries, Bhiddiess, Pile, and interpretable and extreme languar and extensions. No effoctually relative remany has ever been found for these also using complaints the our late discovery in the use of Electricity in strict accords ce with the positive and negative polarization of the Uterine Organa. We dever fail its entiring sin of the above disclasses, except in case of organic explanation, or severe injuries of the parts.

Mrs. Fulcon, a lady of great expensive and aboilty, will have entire charge of treating in the failes' department.
